REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Claims 19 and 27 are allowed for the reasons indicated by the examiner in the Office Action mailed on March 17, 2005.

Per claim 23, while it is known in the art to provide a body having an opened first end, a second end and a side wall extending between said first and said second ends, said first end defining an integrally formed shoulder and is adapted to removably receive and support a bottom edge of a barrel, a bottom integrally formed with said side wall approximate said first end; said side wall and said bottom together defining a shallow receptacle for receiving liquid (see, for example, either US Pat No 443,246 to Vecsey et al or US Pat No 4,052,163 to Patzner), in the examiner's opinion, the prior art fails to teach or fairly suggest modifying the prior to further include a coolant return line having the recited positioning as part of a coolant reclaiming system and the barrel allowing coolant to flow through a bottom wall of the barrel. The elements recited in the preamble are given patentable weight, as the elements are recited in the body of the claim are required for completeness. Accordingly an apparatus that is not in a coolant reclaiming system falls outside the scope of the instant invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
